Generating MD5-checksum

- start **md5summer.exe**
- select the root-folder or -drive that contains the file(s) to be checked
- press button [Create sums]
- select the file(s) or folders to be checked
- click on [Add recursively] and [OK]
- md5summer is generating the checksum-file (*.md5)
- save and make the checksum-file available for upload together with the other data
